Effects of the Tohoku-Kanto Earthquake Aftershocks in Japan (6th Report)

SANYO CHEMICAL INDUSTRIES, LTD.
(Japan securities code: 4471)

Due to the aftershocks that occurred on April 11 and April 12, 2011, Kashima Factory's * transformer short-circuited, resulting in loss of electrical power in parts of the factory, and therefore disruption to some of the production lines.

It is expected to take approximately one week to fully restore power and operations. This may affect the supply of some products, however, we are making a concerted effort to achieve this.

We appreciate your understanding and cooperation.

For more information concerning specific Sanyo Chemical products, please contact your allocated sales representatives.
