Technological Capabilities and Business History

In 1907, Tada Soap-Oleo Works, our predecessor, was founded in Kyoto. Despite limited resources, we have focused on strengthening our technological capabilities, such as producing Japan's first olive soap, and laid the foundations for interface control technology.

In 1949, Sanyo Oil & Fat Industrial Co., Ltd. (now Sanyo Chemical Industries, Ltd.) was founded, inheriting the spirit of Tada Soap-Oleo Works. Through our interface control technology and customer-oriented product development, we now offer approximately 3,000 types of functional chemicals.
